Education

Gopalganj Science and Technology University

Gopalganj, Bangladesh

- Bachelor of Science in Computer Science and Engineering;

December 2024

Experience

Learnathon 3.0 – Job-Ready Tech Program, Sponsored by Brainstation23

Dec 2024 – Present

- Learned **Django**, Software Development, Version Control (Git), Design Patterns, and Database Management through real-world projects with industry mentorship.

Trickcel

Remote / Software Engineer

Dec 2024 – Present

- Developed responsive user interfaces using **Angular** and **Tailwind CSS** for an e-commerce platform, ensuring seamless experiences across devices.
- Integrated **RESTful APIs** to manage product data, shopping carts, and orders, contributing to a fully functional and dynamic frontend.
- Collaborated remotely with cross-functional teams using **Git** and **GitHub**, maintaining high code quality and supporting agile development workflows.

Technologies

- **Programming Language** : C/C++, Python, JavaScript , TypeScript.
- **Python Library**: Pandas, Numpy, Matplotlib, OpenCV.
- **Web Development** : Html, CSS , Tailwind CSS, Django ,Angular.
- **Tools** : Git, GitHub, VS Code, Figma, LaTeX.
- **Other's** : Strong knowledge in core computer science fields such as **Data Structures, Algorithms, OOP, OS, MySQL, Rest API.**

Problem Solving

- Solved (e.g., 3200+) algorithmic problems on different online judge.
 - **Codeforces**: [Asfak_Shahrier](#) | Max rating: 1462 (Specialist)
 - **Leetcode**: [AsfakShahrier](#) | Max rating: 1820 (Knight)
 - **Atcoder**: [Asfak_Shahrier](#) | Max rating: 823
 - **CodeChef**: [asfakcse027](#) | Max rating: 1812 (4★ Coder)

Project Experience

CareHUB, Salon & Parlor Booking Platform

[\[LINK\]](#)

- Developed an online booking system allowing users to find, compare, and book salons based on reviews, pricing, and availability. Implemented a barber selection feature and real-time time-slot booking for a personalized experience.
- Tools Used: HTML, Tailwind CSS, JavaScript, Django, PostgreSQL

Railway Ticket Booking System

- Developed a comprehensive Railway Ticket Reservation System leveraging the Django web framework.
- The primary objective of the system was to enable users to seamlessly book train tickets for specific dates and receive a confirmed ticket in the form of a PDF.
- Tools: Django, SQLite.

Undergraduate Research Experience

"Characterizing the Role of Link in Tweets by npm Maintainers: Source, Purpose and Decay."

- Investigated 18,408 links in NPM maintainers' tweets to understand their role in the NPM ecosystem. Outcome: Most links target package management content like blogs and tutorials. 80% are unique, 20% repeated. GitHub is the top domain after Twitter, with 5% of links inaccessible.

"Predicting CSE Undergraduate Students' Careers Using Machine Learning Algorithms in the Context of Bangladesh."

- A survey of 468 CSE students from various Bangladeshi universities identified key factors influencing career choices, including academic skills, soft skills, and job preferences. Outcome: Most students prefer the software development sector. ML algorithms like Logistic Regression, Decision Tree, Random Forest, and others were applied, with Random Forest achieving the highest accuracy.

Language

- **English** : Professional proficiency.
- **Bangla (Mother Language)** : Native or bilingual proficiency.

Achievement

- Specialist at Codeforces.
- Ranked 1st among Bangladesh in June CodeChef Starters 2021 (Division 3).
- 3rd place - UGV SOUTH ZONE Programming Contest (Team Contest).
- 4th place - at KU Programming Contest.(Team Contest).
