

Asfak Shahrier

Software Engineer

Lakshmipur, Bangladesh • shahrierasfak27@gmail.com • +8801796512473
asfakshahrier.com • github.com/asfakT • linkedin.com/in/asfak-shahrier

Professional Summary

Software Engineer with hands-on experience building production web applications using Angular, Laravel, and Django. Published two ML research papers and developed AI-powered tools using OpenAI and Google Gemini APIs. Active competitive programmer with 3,200+ problems solved.

Technical Skills

Languages: Python, C/C++, JavaScript, TypeScript, PHP

ML / Data Science: Scikit-learn, XGBoost, Pandas, NumPy, Matplotlib, Seaborn, NLTK

Web Development: Django, Angular, Laravel, React, Tailwind CSS, HTML/CSS, REST API

AI Integration: OpenAI GPT API, Google Gemini API, LLM application development

Tools: Git, GitHub, Jupyter Notebook, LaTeX, PostgreSQL, MySQL, VS Code, Figma

CS Fundamentals: Data Structures, Algorithms, OOP, Operating Systems.

Research Publications

“Understanding Link Sharing Practice in NPM Related Tweets by Package Maintainers Community”

Communications in Software and Systems | **In Press** | Supervised by Asst. Prof. Syful Islam, GSTU

- Conducted mixed-methods analysis of 18,408 links from 39,426 tweets by NPM package maintainers
- Found 40% of tweets contain links; blog posts and tutorials most shared; GitHub is top external domain
- Identified 5% link decay rate; proposed ethical link-sharing guidelines for JavaScript developer community

“Predicting CSE Undergraduate Students’ Careers Using ML Algorithms in the Context of Bangladesh”

IEEE Conference | **Under Review** | Supervised by Asst. Prof. Saleh Ahmed, GSTU

- Proposed the first multi-label career prediction framework for 468 CSE students across 47 universities in Bangladesh; 24 features including CGPA, technical skills, soft skills, and career preferences
- Evaluated 10 ML classifiers; XGBoost: accuracy 61.70%, Recall 0.737, F1 Micro 0.792, Hamming Loss 0.060
- Released full dataset, preprocessing scripts, and experimental pipeline publicly for reproducibility

Professional Experience

Software Engineer

Dec 2024 – Present

Trickcel • Remote • Full-time

- Developed production e-commerce platform UI using Angular and Tailwind CSS, currently serving real users
- Integrated RESTful APIs for product catalog, shopping cart, and order management systems
- Collaborated in agile workflows using Git and GitHub with cross-functional remote teams

Training & Certifications

Learnathon 3.0

Dec 2024 – Jun 2025

Brainstation23 • Industry Training Program

- Completed intensive mentored program covering Django, Software Design Patterns, Version Control, and Database Management through real-world projects

Data Analysis with Python

May – Sep 2024

Bangladesh Computer Council, ICT Division • EDGE Project • 80 hours • [View Certificate](#)

- Completed government-backed 80-hour certified training on data analysis using Python, conducted by Bangabandhu Sheikh Mujibur Rahman Science and Technology University

Projects

CSE Career Prediction (*ML / Research*)

- First multi-label ML framework predicting career paths for 468 students across 47 universities; XGBoost ranked best across accuracy, recall, F1, and Hamming Loss; linked to peer-reviewed paper
- *Tools:* Python, Scikit-learn, XGBoost, Pandas, NumPy, Matplotlib, Jupyter Notebook

IELTS Daily Tracker (*AI Web Application*)

- Full-stack IELTS preparation tracker with AI writing review using OpenAI GPT and Google Gemini APIs; includes daily logging, automated feedback, and progress visualization
- *Tools:* React, Laravel, OpenAI GPT API, Google Gemini API, PostgreSQL, Tailwind CSS

LMS (Learning Management System) (*Production*)

- Production LMS with course management, enrollment, assignment submission, email notifications, and admin dashboard; currently live
- *Tools:* Laravel, MySQL, Blade, Bootstrap

E-commerce Platform (*Production*)

- Production e-commerce frontend serving real users; integrated product, cart, and order management APIs
- *Tools:* Angular, Tailwind CSS, REST API, Git

CareHUB (*Salon and Parlor Booking Platform*)

- Online booking system for salons with real-time slot booking and barber selection
- *Tools:* Django, PostgreSQL, Tailwind CSS, JavaScript

Education

B.Sc. in Computer Science and Engineering

Dec 2024

Gopalganj Science and Technology University (GSTU), Bangladesh

Competitive Programming

3,200+ problems solved across multiple platforms:

- **Codeforces:** Specialist (top 20% globally) | Rating: 1462 | [View Profile](#)
- **LeetCode:** Knight | Rating: 1820 | [View Profile](#)
- **CodeChef:** 4★ Coder | Rating: 1812 | [View Profile](#)
- **AtCoder:** Rating: 823 | [View Profile](#)

Achievements

- **1st Place** — June CodeChef Starters 2021 (Division 3)
- **3rd Place** — UGV South Zone Programming Contest (Team)
- **4th Place** — GSTU Intra University Programming Contest 2023 (Team)
- **4th Place** — KU Programming Contest (Team)
